# Unattended servers and PCs administration

If you want to administrate unattended servers or PCs, you have to install Ammyy Admin Service. It'll let you additionally do remotely the following:

- Restart computer
- Lon On/Log Off
- Switch Users and so on

Installation guide:

1. Log on to Windows as administrator
2. Download and save to disk [Ammyy Admin](#)
3. Launch Ammyy Admin
4. Add permissions and password for operator's computers

    4.1. Press menu "Ammyy"->"Settings"
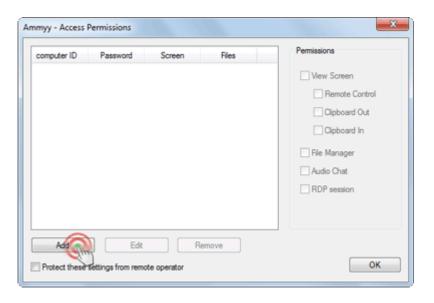

## 4.2. Press "Access Permissions" button

4.3. Press "Add" button

4.4. Specify operator's computer ID (or leave ANY) and password

5. Install "Ammyy Admin Service"

Press menu "Ammyy" -> "Service" -> "Install"

6. Start "Ammyy Admin Service"

Press menu "Ammyy" -> "Service" -> "Start"

Ammyy Admin Service is installed and ready for work.
